The KING Service Department is dedicated to providing its dealers and customers with the highest possible level of satisfaction and service.

The KING Service Department stays up to date with the latest information to assist you in keeping troubleshooting and repair time to a minimum.

When calling our service department, a KING technician will issue a Customer ID Number (or Case Number) and then clearly define the proper course of action to follow. If any work is to be performed or parts replaced, a Service Order Number will also be issued. Additionally, the KING technician will create a call log to aid in properly documenting the warranty claim.

**IMPORTANT!**
For warranty reimbursement, you must call KING for a Service Order Number BEFORE performing any work: (952) 922-6889.
KING Jack Antennas are covered by a **TWO YEAR PARTS AND ONE YEAR LABOR** limited warranty from the date of original purchase. This warranty does not cover installation and external wiring, or refurbished units. This warranty also does not apply where:

- The product has been abused, misused, improperly installed or improperly maintained.
- Repairs have been made or attempted by others that are not certified by KING to do such repairs.
- Repairs are required because of normal wear and tear.
- Alterations have been made to the product.
- The antenna head, base mount or interior enclosure has been opened without authorization.
- Damage has been caused by power washing.
- Circumstances beyond the control of KING cause the product to no longer operate correctly.
- Customer is not the original owner.

### PROCESSING A WARRANTY CLAIM

**IMPORTANT! Only KING certified dealers are authorized to perform warranty evaluations and repairs.**

1) Technician must first determine if the unit is under warranty by verifying original owner and date of original purchase. Dealer must provide one of the following when submitting a warranty claim:

- copy of original purchase receipt, or
- if unit was installed by an OEM, verification of in-service date

2) Technician must call KING to get a Service Order Number (952) 922-6889. Technician must not proceed without a Service Order Number.

- A KING technician will issue a Service Order Number and advise technician on how to proceed.

3) After repairs are completed, the following must be sent to KING:

- Defective Part if requested by KING (Warranty Labor Claim will not be processed until part is returned.)
- Warranty Consideration Form
- Copy of Work Order
- Proof of Purchase

### KEY POINTS

1) For units in service longer than one year, the customer is responsible for labor time.

2) Installation parts (for example, coax cables) are not covered.

3) Replacement parts are sent directly from KING. **DO NOT USE NEW PRODUCT FOR WARRANTY REPLACEMENT WITHOUT WRITTEN AUTHORIZATION FROM KING.**

4) Technician must call KING before performing any work for which warranty labor reimbursement will be submitted to KING. A KING technician will issue a Service Order Number and specify the allotted time for the repair. If repairs will take longer than the allotted time, and the servicing dealer wishes to receive proper reimbursement, the technician must receive prior authorization to exceed the allotted time.

5) Warranty claims must include: proof of purchase, Warranty Consideration Form with Service Order Number, and copy of work order with labor time which matches that allotted by KING.

6) KING shall reimburse the servicing dealer for warranty work at their published labor rates.

7) If returning defective part, include paperwork with part. Clearly mark the Service Order Number on outside of box.
Section 3  KING JACK OPERATION WITH SURELOCK SIGNAL METER

OPERATION

The wall mount Power Injector will switch between cable feed and over-the-air signals from the KING Jack antenna.

To use the Power Injector, simply turn the unit on with the ON/OFF button. When on (button depressed), the power light will turn green indicating +12 volts to the antenna, and the over-the-air signal from the KING Jack antenna will be fed to the two TV outputs.

When off, the cable TV signal will be fed to the two TV outputs if wired for cable TV input.

POSITIONING THE ANTENNA

1. Turn on Power Injector (power is now supplied to the KING Jack antenna). (Make sure TV is also on.)
2. Turn on KING SureLock Signal Meter with switch on side of rotational knob enclosure.
3. Rotate attenuator dial fully clockwise.

**NOTE:** In step 4, LED lights will illuminate from left (next to power) to right. All LED lights may not illuminate depending on signal strength.

4. Depress button on rotational knob and rotate antenna until maximum number of LED lights illuminate on signal meter.
5. Rotate attenuator dial counter clockwise until last illuminated LED light flickers.
6. Rotate antenna to illuminate last flickering LED light.
7. Repeat steps 5 and 6 to pinpoint signal reception.
8. Follow instructions for TV or converter box to scan for available channels.
OPERATION

The wall mount Power Injector will switch between cable feed and over-the-air signals from the KING Jack antenna.

To use the Power Injector, simply turn the unit on with the ON/OFF button. When on (button depressed), the power light will turn green indicating +12 volts to the antenna, and the over-the-air signal from the KING Jack antenna will be fed to the two TV outputs.

When off, the cable TV signal will be fed to the two TV outputs if wired for cable TV input.

POSITIONING THE ANTENNA

1. Turn on Power Injector (power is now supplied to the KING Jack antenna). (Make sure TV is also on.)

NOTE: In steps 2-5, keep track of in which direction you received the most channels when each scan is complete.

2. Perform an initial channel scan per the digital TV or digital TV converter box manufacturer’s instructions.

3. Depress button on rotational knob and rotate antenna 90 degrees. Scan again.

4. Depress button on rotational knob and rotate antenna 90 degrees. Scan again.

5. Depress button on rotational knob and rotate antenna 90 degrees. Scan again.

6. Reposition the KING Jack antenna to where you received the most channels. Choose one of those channels on the TV.

7. Now monitor the signal strength screen and fine tune the KING Jack until the highest signal strength is achieved.

8. Perform one final scan.

NOTE: Arrow on knob indicates which direction antenna is pointing.

Coax from Wall Plate

To Signal Meter in Vehicle
Section 6  TROUBLESHOOTING FLOWCHART

START

1. Turn on power injector.

2. Does the green LED turn on?
   - NO: Power injector is not powering up.
   - YES: Bad splitter or internal coax. Call KING at 952-922-6889 ext. 174.

   - NO: Bad vehicle coax. Non-warrantable.
   - YES: Are there 12 VDC on coax at splitter/F-connector?

   - NO: Remove antenna from roof.
   - YES: Are there 12 VDC on antenna port?

   - NO: Remove power injector from wall.
   - YES: Rotate antenna and attenuator to illuminate blue LEDs (continue even if no blue LEDs are lit).

3. Are there 12 VDC going into power injector?
   - NO: Bad power source. Non-warrantable.

4. Does the interior enclosure have a built-in signal meter?
   - NO: Remove enclosure cover.
   - YES: Turn on signal meter.

5. Does the red LED turn on?
   - NO: Remove power injector from wall.
   - YES: Rotate antenna and attenuator to illuminate blue LEDs (continue even if no blue LEDs are lit).

6. Are there 12 VDC at signal meter coax?
   - NO: Remove power injector from wall.

7. Are there 12 VDC on coax at splitter/F-connector?
   - NO: Remove power injector from wall.

8. Are there 12 VDC on antenna port?
   - NO: Remove power injector from wall.
See pages 6-7 for location of reference points 1 - 12

12

Are there 12 VDC on the coax at the antenna head?

NO

Remove antenna head from JACK assembly.

YES

Bad antenna head. Call KING at 952-922-6889 ext. 174.

11

Is the red LED lit on the antenna head?

NO

No power to antenna head.

YES

Bad antenna head. Call KING at 952-922-6889 ext. 174.

Perform channel scan on TV (antenna may need to be rotated).

NO

Is there an acceptable number of channels?

YES

JACK antenna is operating correctly.

If this is a JACK with a signal meter and the blue LEDs are not lit: bad signal meter. Call KING at 952-922-6889 ext. 174.

**NOTE:** Power injector part numbers vary and are marked on back of power injector.
Section 9  REPLACE POWER INJECTOR

NOTE: Make sure power to power injector is turned off before proceeding.

1. Remove old power injector and replace with new power injector using diagram below to make correct connections.

POWER INJECTOR
(Part number on back)

POWER INJECTOR BOTTOM VIEW
1. REMOVE EXISTING METER
   - Snap off Enclosure Cover.
   - Remove Screw and Knob.
   - Disconnect Coax from Signal Meter.
   - Remove (4) Screws attaching Enclosure to ceiling.

   NOTE: Turn off power injector before proceeding.

2. INSTALL NEW METER
   - Attach new Enclosure to ceiling with (4) Screws.
   - Route Coax and connect to Meter.
   - Press button on Knob and engage onto Adjustable Connector. Fasten with Screw.
     **KNOB ONLY FITS ON CONNECTOR ONE WAY – SEE INSET BELOW.**
   - Snap on Enclosure Cover. **BE CAREFUL NOT TO DAMAGE LEDS.**

When reinstalling, press button to engage knob onto end of adjustable connector.
**KNOB ONLY FITS ON CONNECTOR ONE WAY.**
1. Remove (3) Screws and carefully lift off Antenna Head/Shroud from Base Mount.

   Coax will pull out of Base Mount as Head is lifted off.

NOTE: Turn off power injector before proceeding.
2. Remove (4) Screws and Washers and remove Shroud.

3. Disconnect Coax.

5. Feed Coax back inside Base Mount and reattach Antenna Head/Shroud to Base Mount.
1. REMOVE EXISTING ANTENNA

**INSIDE**
- Snap off Enclosure Cover.
- Remove Screw and Knob.
- Disconnect Coax from Signal Meter if present.

**OUTSIDE**
- Remove fasteners holding Antenna to roof.
- Remove Antenna and disconnect coax from Base Mount connection.
- Clean up old sealant to insure a good seal when installing new antenna.

**NOTE:** Turn off power injector before proceeding.

2. INSTALL NEW ANTENNA

**OUTSIDE**
- Pull out Adjustable Connector to match approximate length of old Connector.
- Reconnect Coax inside Base Mount.
- Lower Antenna into place, feeding Adjustable Connector (and Meter Coax if present) through roof.
- Seal and fasten Antenna unit to roof. All holes, coax channel, Ring Seal and Base Mount perimeter must be sealed so they are watertight.

**INSIDE**
- Route Coax and connect to Meter if present.
- Press button on Knob and engage onto Adjustable Connector. Fasten with Screw.

**KNB ONLY FITS ON CONNECTOR ONE WAY – SEE INSET ON OPPOSITE PAGE.**
- Snap Enclosure Cover in place. BE CAREFUL NOT TO DAMAGE LEDs.
Press button to engage knob onto end of adjustable connector. **KNOB ONLY FITS ON CONNECTOR IN ONE DIRECTION.**

- Slot
- Alignment Tab
- Adjustable Connector
- Raised Circle
- Raised Ring
- Coax
- Enclosure Base
- Signal Meter
- Knob Screw
- Enclosure Cover
- Decal
- Mount facing front of vehicle
- Apply sealant to bottom of flange on base mount and ring seal. (Butyl tape may also be used where appropriate.)
- Coax from the antenna input of the Power Injector
- Fill coax channel completely
- Adjustable Connector

**IMPORTANT!**
Do not allow sealant to contact adjustable connector.

Sealant must be compatible with roof material.
## Warranty Consideration Form

**Description of Failure and Work Performed**

--------------------------------------------------------
--------------------------------------------------------
--------------------------------------------------------

The following paperwork must be sent to KING for warranty reimbursement consideration:

1) Warranty Consideration Form with Service Order Number
2) Copy of Work Order
3) Proof of Purchase / Sales Receipt or Verification of In-Service Date

**Note:** If returning defective part, please include with paperwork. Warranty Labor Claim will not be processed until part is returned.
Simply better, by design.™
