This manual contains detailed information on your KING One Pro.

To start using your KING One Pro right away, see the Quick Reference Guide.

IMPORTANT!
The KING One Pro works with DIRECTV®, DISH, and Bell™ TV. This manual is for DISH subscribers with Wally receivers. Manuals for DISH (with other receivers), DIRECTV and Bell subscribers are available at kingconnect.com. Use this manual only if you have a Wally receiver.
IMPORTANT!
The satellite TV market is expanding and changing. The information in this manual was accurate at the time
of printing. If your KING One Pro Satellite Antenna does not operate as outlined in this manual, please call
KING® at (952) 345-8147 or visit our website at kingconnect.com. KING is not responsible for changes outside
of its control.

Thank you for choosing the premium KING One Pro Portable HDTV System!

You are about to experience the excitement of satellite television programming and the convenience of the KING One Pro portable antenna, which delivers the very best HD picture and sound quality wherever you go.

**IMPORTANT SAFETY AND CARE INFORMATION**

1. Keep the Quick Reference Guide and Installation Guide that came with your KING One Pro in a safe place for future reference. You may also print this on-line manual and keep it for future reference as well.
2. Follow all instructions and warnings. Set up and operate the KING One Pro in accordance with the instructions.
3. To avoid risk of electric shock, unplug your receiver before connecting/disconnecting the KING One Pro in damp or wet conditions.
4. Tighten all of the coax cable connections only by hand. If you use a wrench, you may over-tighten the connections and damage your equipment.
5. Always handle the KING One Pro carefully. Do not drop the KING One Pro. Avoid excessive shock or vibration to the KING One Pro.
6. Use caution when carrying the KING One Pro. Always carry the KING One Pro by the handle.
7. Do not remove the cover of the KING One Pro without authorization. Doing so will void the limited warranty.
8. Do not stack the KING One Pro on top of or below other electronic devices as this can cause heat build-up or block the satellite signal from reaching the KING One Pro.
9. Do not operate or store near any indoor or outdoor heat source such as radiators, heat registers, stoves, barbecues, campfires, or other items that produce heat.
10. Servicing may be required if the unit has been dropped or damaged in any way or if the unit does not operate normally. Call KING Customer Service at (952) 345-8147.
11. Do not power wash the KING One Pro.
12. Do not submerge the KING One Pro or place in standing water.
13. Keep the enclosure clean from dirt, bugs, and other debris by hand washing with mild soap and water.
14. Do not coat or paint the KING One Pro with any substance.

The KING One Pro has been designed to be maintenance and trouble free. If not using the KING One Pro for long periods of time, it is recommended that you set up the system on a quarterly basis (every three months) to keep all moving parts of the KING One Pro in good working order.

If you have any comments or questions, please contact KING Customer Service at (952) 345-8147, or by email at help@kingconnect.com.

**QUESTIONS? (952) 345-8147**
ABOUT SIGNAL LOSS

OBSTRUCTIONS

The KING One Pro requires an unobstructed view of the southern sky for the best signal reception.

Be sure to place the KING One Pro in a location free from obstructions such as people, trees, buildings, vehicles, etc. This will allow for the strongest signal and will help prevent any interruption to your programming. Point the handle approximately north to speed up scan time.

RAIN AND SNOW FADE

Though rare, heavy rain, snow, or dense cloud cover can reduce the satellite signal, which may interrupt your programming. Your programming should return as conditions improve.

SECURITY

The KING Antenna can be secured to an object by looping a cable thru the handle.

To a secure object

Cable sold separately.
You will also need (sold separately):

- DISH Programming Subscription
- Power Inserter with Power Supply
- DISH Wally Receiver
- (3) Rubber Feet Short Coax Cable
- 50’ RG-6 Coax Cable
- Installation Guide
- Quick Reference Guide
- Registration Card
- Antenna Unit
- DISH Wally Receiver
- Cable(s)

## APPLY RUBBER FEET TO ANTENNA UNIT

**IMPORTANT!**
Do not apply rubber feet if roof-mounting the antenna unit. See the Installation Guide included in the box.

- Apply (3) rubber feet
- Soft, non-scratching surface

Do not apply here.
Connect components in following order.

A Connect coax cables.  B Plug in power inserter.  C Plug in receiver(s).

**Power inserter is for indoor use only.**
Place the power inserter in an accessible location.
Do not over-tighten the coax connections.
Do not put sharp bends or kinks in the cables.
Do not route the cables where they can be tripped on or run over by a vehicle.

**NOTE:** If your main receiver has two SAT IN ports: AUX coax may be connected to second SAT IN port for dual tuner usage.

After connecting and plugging in all components, wait for the power inserter LED to turn steady green.

The Mobile Antenna Setup screen should appear on your TV.
Go to the next page.
DISH with Wally receivers and the ViP models listed below (in the gray box) use mode 1. The KING One Pro comes factory preset for mode 1. If your antenna is new, you will not need to configure it.

⚠️ IF YOUR ANTENNA IS NEW, SKIP THIS STEP AND GO TO PAGE 8.

IF YOUR ANTENNA IS NEW, SKIP THIS STEP AND GO TO PAGE 8.

Make sure the LED is steady green

To enter Configuration Mode, press and hold (~3 sec) the power inserter button until one of the options below appears

1. Press and release as needed to choose Mode 1

2. Press and release as needed to choose Mode 1

MODE 1 (DISH)

- BLUE pattern repeats...

- MODE 2

- RED pattern repeats...

- MODE 3

- GREEN pattern repeats...

- MODE 4

- RED pattern repeats...

3. Press and hold (~3 sec) until LED turns steady green

Go to next page to start a scan.
NEW AND UNACTIVATED WALLY RECEIVER

IF YOUR RECEIVER IS NEW AND UNACTIVATED, START HERE.
Otherwise go to STANDARD OPERATION on page 14.

WHILE IN USE, DO NOT BLOCK THE ANTENNA UNIT’S LINE OF SIGHT TO THE SATELLITES IN THE SOUTHERN SKY AT ANY TIME!

ANTENNA UNIT

Place on a reasonably level surface

Pointing the handle approximately north may speed up scan time, but is not required for a successful search

OBSTRUCTIONS

SATELLITES IN SOUTHERN SKY

1. After connecting and turning on your equipment, the Wally Startup screens will appear (this may take several minutes).

IMPORTANT!
Your TV screen may look different from what is shown in this manual. Screen information may vary depending on choices you make during the setup process.

For best results, follow the on-screen instructions.
2. Follow the on-screen instructions to pair your remote control.

IMPORTANT! If present, pull out the protective battery tab from the battery compartment on the back of the remote.

3. Use the arrow buttons on your remote to highlight “Next” and press Select.

4. Follow the on-screen instructions to select your display resolution.

5. The Mobile Antenna Setup screen will appear.
6. Use the arrow buttons on your remote to highlight the state menu. Press **Select** on your remote to open the state menu.

Use the arrow buttons on your remote to highlight the state you are currently in.

Press **Select** on your remote. (State selection will be saved.)

**NOTE FOR STEP 7:** The mode menu may not be present on all receivers.

The 110, 119, 129 trio will work for most of the country.

The antenna unit may have trouble locking onto the 129 when in the northeastern United States (you can use the Dish Diagnostics Screen after a scan to check this).

If the antenna unit does not lock onto the 129, choose the 61.5, 110, 119 trio.

Any programming from the 129 will not be available when using the 61.5, 110, 119 trio.

7. Use the arrow buttons on your remote to highlight the mode menu. Press **Select** on your remote to open the mode menu.

Use the arrow buttons on your remote to highlight the mode you wish to select.

Press **Select** on your remote.
8. Use the arrow buttons to highlight “Scan” and press Select.

This screen will appear while the antenna scans for satellites.

The satellite signals are being acquired. When complete, the system will proceed to the next step automatically.

9. You are now ready to activate your receiver. Call a DISH mobile antenna specialist to activate your receiver.  

1-800-963-DISH (3474)
After calling to activate your receiver, a software download will begin.

Do not disturb or unplug your receiver during this process!

10. When the download is complete, the installation summary will appear.

Use the arrow buttons on your remote to highlight “Activate Receiver” and press Select.

The receiver activates.

This may take a while. PLEASE BE PATIENT.

The installation summary screen confirms receiver activation.
11. Use the arrow buttons on your remote to highlight “Watch TV” and press Select.

The receiver will acquire signal.

12. Watch TV!

NOTE: Your Wally should have downloaded its program guide already. Check and make sure the full guide is available. If it is not, you will need to reset the Wally for it to download the full guide.

If there is a software update available for your Wally, it will automatically download when you put your Wally in standby mode.

You can now use STANDARD OPERATION on page 14.
STANDARD OPERATION

IF YOUR RECEIVER IS NEW AND UNACTIVATED, MAKE SURE TO DO THE FIRST-TIME SETUP PROCEDURE ON PAGES 8-13 FIRST.

WHILE IN USE, DO NOT BLOCK THE ANTENNA UNIT’S LINE OF SIGHT TO THE SATELLITES IN THE SOUTHERN SKY AT ANY TIME!

ANTENNA UNIT

NOTE: This manual shows graphics for a DISH Wally receiver. If you have a ViP model receiver, you can access the KING One with ViP Receiver Owner’s Manual by going to kingconnect.com/support. Click on “Owners Manuals” and choose the manual for KING One with ViP receiver.

1. After connecting and turning on your equipment, the Wally Startup screens will appear (this may take several minutes).

   NOTE: If the Wally Standby screen appears, press any button on your remote to continue.

IMPORTANT!

Your TV screen may look different from what is shown in this manual. Screen information may vary depending on choices you make.

For best results, follow the on-screen instructions.
2. After the Wally starts up, the Mobile Antenna Setup screen will appear.

NOTE FOR STEP 3: The mode menu may not be present on all receivers.

The 110, 119, 129 trio will work for most of the country.

The antenna unit may have trouble locking onto the 129 when in the northeastern United States (you can use the Dish Diagnostics Screen after a scan to check this).

If the antenna unit does not lock onto the 129, choose the 61.5, 110, 119 trio.

Any programming from the 129 will not be available when using the 61.5, 110, 119 trio.

3. Use the arrow buttons on your remote to highlight the mode menu. Press Select on your remote to open the mode menu.

Use the arrow buttons on your remote to highlight the mode you wish to select.

Press Select on your remote.
4. Use the arrow buttons on your remote to highlight the state menu. Press **Select** on your remote to open the state menu.

   Use the arrow buttons on your remote to highlight the state you are currently in.

   Press **Select** on your remote. (State selection will be saved.)

5. Use the arrow buttons on your remote to highlight “Scan.”

   Press **Select** on your remote.

The scan will begin and may take up to several minutes to complete.

This screen will appear during the scan.

When the scan is complete, the Acquiring Signal screen will appear.
After your receiver has acquired the signal, the program guide will download. This may take up to 10 minutes to complete (potentially longer if an external hard drive is connected).

6. When the guide has downloaded, live TV will appear.

Enjoy!

OPERATING NOTES:

If you move the KING One Pro while in use, or get a screen indicating complete signal loss, you will have to perform a new scan to restore programming by going to the Mobile Antenna Setup screen as follows:

Press the HOME button to return to the home page. Choose “Settings” and then “Diagnostics.” Choose “Dish 3” and then “Test Installation 5.” This will take you back to the Mobile Antenna Setup screen. Initiate a new scan.

When in the northeastern United States, television programming from the 129 satellite may not be available (see page 15).

If your system is inactive for an extended period of time, you may have to call DISH Customer Service at 1-800-333-DISH (3474) to reauthorize your receiver.

If your receiver has not been used for a while the 013 error message may appear. Call 1-800-333-DISH (3474) and follow the prompts to reauthorize your receiver. Note that if channel 101 appears, scroll channel up or down to make sure 013 error message does not appear.

You can view your programming when your receiver has been authorized and the guide has finished downloading.
SECOND RECEIVER OPERATION

INITIAL SETUP FOR SECOND RECEIVER

1. Make sure your second receiver has been properly set up and activated (while connected to the MAIN port) as described in the New and Unactivated Receiver Section (page 8).

2. Connect your properly activated main receiver to the MAIN port. Run a scan to lock onto the satellites.

3. Connect the second receiver to the AUX port.

4. Run a check switch test on second receiver. When test is complete, save the results.

DOWNLOADING PROGRAMMING TO THE SECOND RECEIVER

5. After completing the check switch test, reset the second receiver by pressing the POWER button on the front panel for 10 seconds. The receiver will reboot and go into sleep mode (green light on front panel will be off). Press Select to wake it up.

The receiver will then download the program guide to show only the channels available on the current satellite as determined by the channel selected on the main receiver. Downloading the new program guide can take up to five minutes to complete.

The channels available on the second receiver are determined by the channel/satellite selected on the main receiver. For example, if you select a channel on the main receiver that is broadcast from the 119 satellite, then the second receiver will be able to view any channel broadcast from the 119 satellite.

If you switch channels on the main receiver to one that is broadcast from a different satellite, (for example, your channel was broadcast from satellite 119 but your new channel is broadcast from the 110), the antenna will automatically switch to the 110 satellite and programming will be lost on the second receiver until you either:

- Select a channel on the main receiver that is broadcast from the previous satellite (satellite 119 in this example).

  (or)

- Reset the second receiver by running another check switch test to download the program guide for the newly selected satellite (satellite 110 in this example).

NOTE: If you choose a channel on the main TV that causes the antenna to switch satellites, you may have to run a check switch on the second receiver.
ACCESSORIES (Sold separately - see the satellite antenna accessories page at kingconnect.com)

**MB700 Quick Release Roof-Mount Kit**
- Allows you to easily use your KING One Pro as either a roof-mounted or portable antenna.
- KING Antenna not included.

**MB500 Mounting Bracket**
- Includes (2) Hanger Brackets
- Allows hanging of antenna unit on vehicle window or included hanger bracket.
- For stationary use only.
- Vehicle must not be in motion while antenna unit is on window or hanger bracket.
- KING Antenna not included.

**MB100 Mounting Bracket**
- KING Antenna not included.

**CB1000 Carry Bag**
- KING One Pro fits securely inside. Features include zippered cover, foam padding, carry handles and pockets for cables, receiver and remote.
- KING Antenna not included.

**MB160 Mounting Bracket**
- MB160 Mounts to Back of Vehicle
- The KING One Pro is not compatible with the MB100 Mounting Bracket. Use of the MB100 will void warranty.
- The use of any unauthorized mounting bracket will void warranty.
- KING Antenna not included.

**TR1000 Tripod Mount**
- Allows you to position your KING One Pro almost anywhere for best line of sight to satellite. Keeps antenna off the ground away from moisture.
- KING Antenna not included.

LIMITED WARRANTY

KING One Pro Satellite Antennas are thoroughly inspected and tested before leaving the factory, and are covered by the following limited warranty from the date of original purchase:

- Two-year parts warranty: The customer is not responsible for the cost of replacement parts if the original part is determined to be defective under the terms of the warranty. The customer is responsible for the cost of replacement parts after two years.

- One-year labor warranty: The customer is not responsible for labor costs to repair unit if labor is performed within the labor warranty period. The customer is responsible for all labor costs after one year.

Only KING and certified dealers may perform warranty evaluations and repairs. Depending upon the problem, KING may authorize a dealer to perform the necessary repairs. Any warranty labor outside of that performed at the factory is not covered unless 1) the product has been installed by an authorized dealer/installer or OEM manufacturer and 2) the dealer/installer receives prior authorization to perform the repair.

A certified dealer must not perform any repair without first contacting KING for a Service Order Number. KING will advise the dealer on how to proceed with any repairs.

Should any trouble develop during the warranty period, contact KING at (952) 345-8147. You must contact KING before the warranty period expires. The customer must supply proof of purchase (such as a dated sales receipt) when requesting warranty service. If the customer cannot supply proof of purchase, warranty period shall start 30 days after date of manufacture.

If it is determined that the unit needs to be returned to KING, customer must return COMPLETE product, freight prepaid, to: KING, 11200 Hampshire Avenue South, Bloomington, MN 55438-2453.

If inspection shows the trouble is caused by defective workmanship or material, KING will repair (or at its option, replace) without charge.

When returning product, KING will supply an RMA number (Return Merchandise Authorization). This number must be clearly written on the box. Failure to clearly write RMA number on box may result in delays in processing claim. Along with product, customer should include in the box: his/her name, address, daytime phone number, proof of purchase and description of the problem.

This warranty does not cover installation and external wiring, or remanufactured units. This warranty does not cover damage caused by the use of an accessory other than a KING accessory designed for the product. This warranty is not transferable from the original owner.

Due to the expanding and changing TV market, KING cannot be held responsible for changes made to satellite services. Software updates to address such issues are not covered under warranty.

This warranty also does not apply where:

- The product has been abused, misused, improperly installed or improperly maintained.
- The product has been used with an accessory other than a KING accessory designed for the product.
- Repairs have been made or attempted by others that are not certified by KING to do such repairs.
- Repairs are required because of normal wear and tear.
- Alterations have been made to the product.
- The product or any associated component has been opened without authorization or disassembled to any degree.
- Damage has been caused by power washing.
- Circumstances beyond the control of KING cause the product to no longer operate correctly.
- Customer is not the original owner.

In no event shall KING be liable for any indirect, incidental, or consequential damages from the sale or use of the product. This disclaimer applies both during and after the term of this warranty.

KING disclaims liability for any implied warranties, including implied warranties of “merchantability” and “fitness for a specific purpose,” after the term of this warranty.

This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not incur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
Simply better, by design.™
